NORTH ANDOVER, MASS.

Established 1832

Manufacturers of Textile Machinery and Card Clothing for Woolen and Worsted Mills

We have been making woolen mill machinery since 1832.

Our plant is the largest in its line in the United States.

Our machines are the standard for this country, and are continually being exported.

Products:

Card Clothing.

Carding Machines for Woolen, Worsted, Mohair, Asbestos, Cotton Waste, Flax Waste, Jute Waste, Silk Waste and Shoddy.

Garnet Breasts.

Condensers or Rubbs.

Card Clothing Grinding Machines.

Wool Pickers.

Burr Pickers.

Wool Dusters.

Spinning Mules for any stock which can be Spun on the Woolen Principle.

Bobbin Winders.

Perches.

Dressers or Slashers.

Beamers.

Reels.

Spoolers.

Skein Spoolers.

Skein Winders.

Tape Condensers.

Twisters.

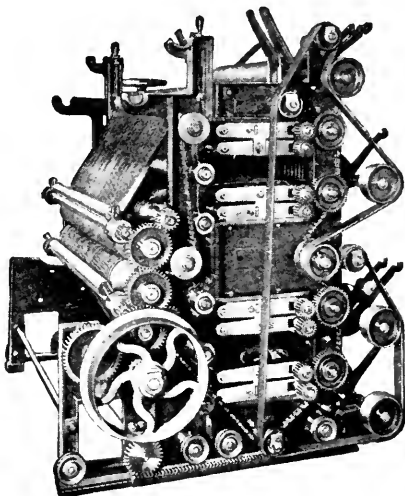

Chinchilla Machines.

Napping Machines for Woolens, Cotton and Knit Goods.

LEVER BOTTLE BOBBIN WINDER

This is a mule warp bobbin that was formerly used as a filling bobbin. It is now used to fill the bobbin shown on the right.

This bobbin was wound on a LEVER Cop and Bobbin Winder. It contains $2 \frac{1}{5}$ times the yardage of yarn contained in the bobbin on the left.

LEVER COP AND BOBBIN WINDER

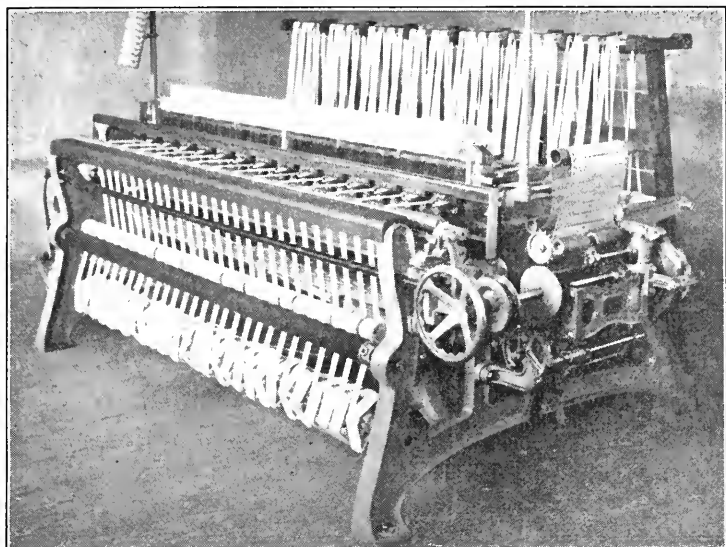

is built to put the greatest amount of yarn possible in a cop or bobbin, thereby lessening weaving costs and increasing the production of each loom.

THE
PICK
COUNTER

ROOT COUNTERS

They Eliminate Uncertainty

Wouldn't you like to eliminate uncertainty from the measuring of the output of your plant and establish a solid foundation for satisfactory and cordial relations between yourself and your employees?

You can.

By modernizing the measuring of your product.

Whether it be the counting of picks or hanks there is a Root counting machine, made right here in the heart of the textile industry, for the special purpose of doing your measuring better than it was ever done before.

They are reliable and dependable.

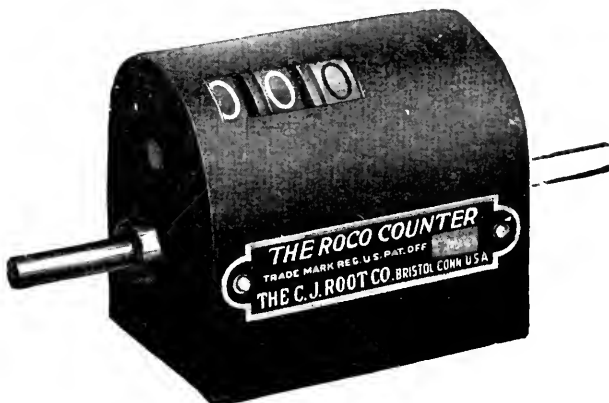

And so substantial that the jars from the machines do not rack them to pieces.

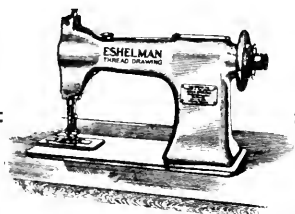

Their life is longer than the life of your machines.

Ask for our new book on counting. It's known as catalogue "F-1"

The Hank Clock

YOU CAN COUNT
ON
ROOT COUNTERS

Fine as Hand-Work at a Fraction of the Cost

The **Eshelman Thread Drawing Machine** produces work equal to hand drawing at a fraction of the cost. The Machine does as much work as twelve or fifteen girls can do by hand.

It is especially suited to manufacturers of hem-stitched sheets and pillow slips, art embroideries, table damasks, etc., either cotton or linen.

The illustration shows the sort of work the Eshelman Machine does. Department Store Buyers tell us that work done on our machines sells more readily because of its fine appearance, resembling hand-drawn hemstitching. Ask any user of the Eshelman Thread Drawing Machine of its merits—he is a satisfied customer.

We will send a machine to you for free trial in your own factory, under your own factory conditions if you wish, or we shall be glad to send you a booklet with full information.

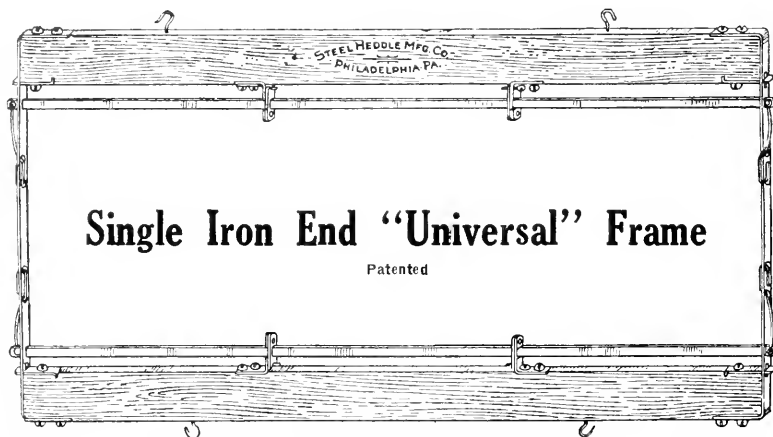

JOHN W. ESHELMAN, Jr.
Lancaster, Pa.

The Flat Steel Heddle and Universal Frame

Are playing today a very prominent
part in the efficient running of looms

A LARGE percentage of Manufacturers realize the great importance of the Steel Heddle—the heddle punched from *flat cast steel*—with the round cornerless eye, that cannot catch, rub or chafe or pull the Warp Thread—the heddle that adjusts itself automatically on the frame—the heddle that cannot twist or bend while at work.

THE UNIVERSAL FRAME

Single Iron End "Universal" Frame

Patented

is used in hundreds upon hundreds of Textile Mills. Why? Because it is built for service—for efficiency—for durability. It is built for real economy—not the fake economy of an original low price. You can have the *Universal Frame* built to fit the peculiar conditions of your mill and your product.

COTTON, SILK, WORSTED or WOOL

THERE IS A HEDDLE AND FRAME FOR THE WORK

From fancy cotton shirtings to canvas—from narrow fabrics to broad silk—from light worsteds to heavy woollen cloths, there is a heddle and frame for your particular kind of work.

We are manufacturers of the best doup heddle the market ever produced. We are makers of the best finished drop heddles and wires you ever had in your mill. The "Made in America" cast steel Reed Wire, which has created quite a sensation, for all kinds of Reeds, is made in our plant. These are facts. Their efficiency has been proven so often that the novelty is lost. Do you want a list of users in your particular line? Write to these people yourself. They'll tell you what Steel Heddle Equipment has done for them.

Quality, strength and efficiency have been so thoroughly demonstrated and established that superiority is universally recognized.

—it's tough stuff!

The basic reason for the remarkable durability of these receptacles is the material out of which they are made. This material is produced in our own mill by our own patented process and combines light weight with strength—will not crack, puncture or tear under most strenuous abuse.

Look for this trademark—

Leatheroid

Style 1—Roving Can—Seamless, rolled fibre top rim, free from all metal or rivets. Six-inch kicking band. Steel bottom reinforced with steel ring.

Style 2—Roving Can is made with coppered steel top rim.

Style 2—Warehouse Car. Body—Leatheroid inside—steel outside. Wood bottom with 3 hardwood cross cleats. Top rim of hardwood covered with steel. Casters with self-oiling iron wheels.

OBLONG STYLE

Lane-Woven Cotton Duck with its smooth, yielding surface, and wonderful strength, is the logical material for conveying both the delicate, and the heavy, rough commodity.

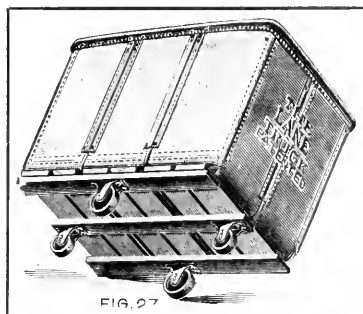

ROUND TAPER STYLE

The light weight flexible steel frame yields, with the duck, under strain. In severe handling this feature adds years to its life. Hard wood Shoes are renewable when finally worn out.

LANE TRUCKS

With their Improved Thread Guard Caster equipment, are unique, in that they are light weight, yet withstand hardest work many years. Casters do not clog with waste, wear flat or damage floors.

Hyatt Roller Bearings

Solid Inner and Outer Race Type of Hyatt Roller Bearing.

Hyatt roller bearings have been used successfully for years on openers, pickers, cards, drawing frames, speeders, spinning frames, twistors, winders, reels, warpers, spoolers, slashers, looms, nappers, warpers, mercerizers, calenders, mangles, washers, squeezers, dye pads, fulling mills, tenters, extractors, crabbing machines and on line shafting.

Hyatt roller bearings, by providing a true rolling motion, eliminate at least 50% of the dragging friction of plain bearings.

This means a substantial saving in the power required to operate each individual machine. When extended to all the machines in the mill a worth while reduction in power costs results.

Durability is built right into the Hyatt roller bearing. The heat treated, high grade steel rollers, mounted in a rugged cage, will operate for years without appreciable wear. Constant shut-downs for bearing adjustments and bearing replacements are thus eliminated.

For Textile Machinery

Hyatt roller bearings are mounted in oil tight housings and one charge of lubricant is sufficient for several months operation. This makes possible a saving of 80% in lubrication costs.

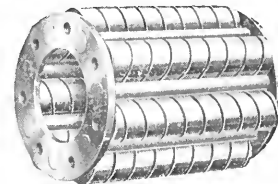

Cleanliness of operation is another Hyatt advantage, as no oil can leak out and spoil the goods.

Textile machines equipped with Hyatt roller bearings render superior, dependable, economical service at a very slight increase in initial cost.

Specify Hyatt roller bearings for your textile machinery.

Hyatt line shaft roller bearings are split, making them easy to put on without taking down the shaft or disturbing the pulleys, collars, and couplings. They save at least 15% of the total power for years without adjustment or replacement and only require lubrication three or four times a year. They are therefore a decided asset to any textile mill. Order them direct from the nearest mill supply dealer.

Split Outer Race Type of Hyatt Roller Bearing.

The Hyatt Roller Bearing is a Simple and Dependable Anti-Friction Bearing

Ideas!

The development of the alternating current system of power distribution in America was a Westinghouse idea. Marvelous electrical development has come about as a direct consequence of this development.

The application of alternating current and the alternating current motor to the textile industry was a Westinghouse idea. It made complete electrification of textile mills a possibility.

The most recent Westinghouse idea developed for the textile industry is individual motor drive for Double Deck Spinners. This idea carries with it higher efficiencies and greater conveniences.

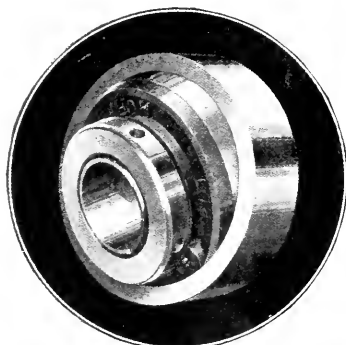

*Complete Information Will Gladly Be
Furnished Upon Request*

Westinghouse

HOFFMANN

PRECISION ROLLER BEARINGS

For years past, this bearing—as manufactured by The Hoffmann Mfg. Company, Ltd., of Chelmsford, England—has enjoyed the highest reputation both in Great Britain and on the Continent as a high-precision, heavy duty unit combining all the speed qualities of the best ball bearing with a load capacity far beyond that of any ball bearing of equal dimensions.

"Hoffmann" Self-Aligning Roller Bearing.

dust-and-dirt-excluding end covers, which are turned spherical on their outside diameter and are fitted into the spherical seating on either side of the bearing. This exclusive Hoffmann feature gives an extremely low coefficient of friction, freedom from lubrication troubles, and no throwing of oil to injure fabrics in process. The running friction of the Hoffmann Roller Bearing is about 1/10 that of a well-fitted plain bearing, while its starting friction is only about 1/800. There is no heating or risk of seizing. The bearing is grease packed, needing renewal of lubricant only once in six months. There is no measurable wear even after years of service. No time and output are lost while renewing bearing bushings on costly machines.

The Hoffmann Self-Aligning Roller Bearing has been applied with most successful results to a large variety of textile machinery, among which may be mentioned waste breakers, openers, rag grinders, willeys or teasers, carding engines, scutchers, looms, hydro-extractors and mangles. The self-aligning feature is obtained without in any way altering the contour of the roller tracks—in other words, without reducing the load-carrying capacity. These bearings are thus capable of precisely the same duty as the standard bearings of the same type and class. The outside of the outer race is ground to a spherical form and fits into a seating formed in the outer shell or housing. The bearings are provided with self-aligning

"Hoffmann" Standard Roller Bearing.

Norma engineers will welcome an opportunity to work with manufacturers and users of textile machinery, in applying these high-precision, heavy-duty bearings with a view to power saving and reduced up-keep costs. Built in all standardized metric and inch sizes, in both standard and self-aligning types, for all speeds and loads.

FOR TEXTILE BELTS, GENTLEMEN, ALWAYS SPECIFY **STEPHENSON**

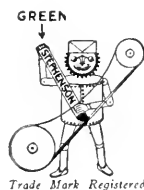

Our Trial Offer

"We will either send you a half pound bar of STEPHENSON Bar Belt Dressing FREE or, we will send you a 30 pound box on a 30 day trial at 48c per pound. If satisfactory you will pay for it. If returned within 30 days no charge will be made if the quantity used is less than 6 pounds.

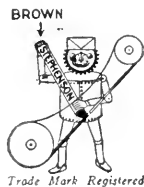

Leather Belts

"For LEATHER BELTS I use the famous STEPHENSON RED LABEL dressing. Of course, I have used it more than any other because leather belts are most common. I have sold and used tons of it. You will find it O. K. in every particular for LEATHER belts. It stops slip, preserves, permits nice slack running, reduces bearing tension and saves much fuel and belt money.

Rubber, Canvas or Balata

"For RUBBER, CANVAS or BALATA belts I recommend STEPHENSON GREEN LABEL. This dressing is to the substitute belt what RED LABEL is to the leather belt. You will find it IDEAL.

Ropes

"For ROPES there is nothing better on the market than STEPHENSON BROWN LABEL. If you have rope drives in your plant you should give BROWN LABEL a fair trial."

Stephenson Mfg. Co.

SEATTLE, 536 First Ave., So.

SAN FRANCISCO, 14 Natoma Street

LOS ANGELES, CAL., Sunset Terminal Warehouse

Wrought Steel Belt Sash Pulleys, Warper Beam Heads and Pressed Steel Shapes.

The basic construction principles of AMERICAN Pulleys have withstood more than twenty-five years of the severest testing. Many refinements have been made since the first one was constructed, but so sound were the basic principles of design that "AMERICAN" Pulleys are today unchanged in their essential features.

Laboratory tests, shop tests and—most significant—performance tests in plants here and abroad where more than six million AMERICAN Pulleys are in daily service, have proved their undoubted quality.

Belt slip, air fanning, weight and every detail of power waste have been studied from every angle to insure maximum power transmission.

American Pulleys are carried in stock by over 350 dealers in the United States and Canada. Write for address of your nearest dealer.

If you wish, we will send catalog describing all "AMERICAN" types and construction details.

American Steel-Split Pulleys

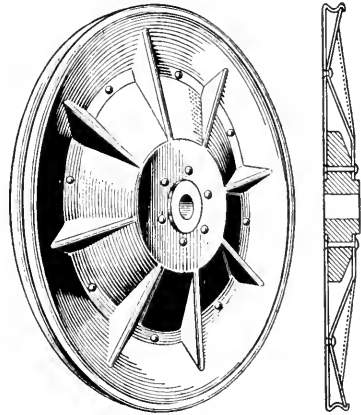

Listed sizes 3" to 120" in diameter.

Crown and Straight faces.

Interchangeable bushings.

All pulleys above 6" diameter have a grooved face.

No set screw or keyways. For unusually heavy duty, keyways may be supplied.

For Main Drive Pulleys

American Pulleys are especially recommended for main or important drives. Made with double, triple or quadruple arms, depending on width of face. Diameters up to 144".

SIX-ARM PULLEYS are made from 7" to 42" diameter, all faces; 44" to 48" diameter, 6" face; either straight or crown face.

EIGHT-ARM PULLEYS are made 44" to 82" diameter, inclusive.

PRESSED STEEL Section Warper Beam Heads

These are made of three parts: an inner and outer head, and a cast center.

The inner head presents a smooth, flat face, which insures a perfect fabric. The outer head is corrugated and is attached to the inner head in a manner which provides absolute rigidity.

The flange, in which a smooth friction groove is formed, is supported around its entire circumference by the outer head.

The complete heads combine extreme lightness with great strength, will not bend, spring, nor get out of true in reasonable handling, shipping or in general factory use.

Diameter	Weight	Diameter	Weight
18"	25 lbs.	24"	36 lbs.
20"	27 lbs.	26"	43 lbs.
22"	30 lbs.	27"	46 lbs.
23"	33 lbs.	28"	50 lbs.

Standard Bores, 1" to 1½".

Standard Hub Length, 1½".

Heads can be made with Entwistle type clutch locking device at center and with driving lugs if required.

TENTERING AND DRYING MACHINES

For Woolens, Worsteds, Felts, Etc.

UPRIGHT—HORIZONTAL
TWENTIETH CENTURY

Hoey's Patented Tenter Frame

The above illustration shows Tenter with drive placed inside the legs which eliminates the use of countershaft or using any part of aisle for outside drive.

Rails made of *structural steel*, which is light, strong and durable—also made of cast iron if preferred. Noiseless, gears run in oil. All parts are accessible. When used as a Swing Tenter a faster and more even motion is obtained than with any other Tenter on the market.

Write for further information.

JOHN ROYLE & SONS
PATERSON, N. J.

Saves Cloth and Time

The Ireland Cloth Cutting, Folding and Winding Machine saves from 8 to 15 per cent of your cloth when large quantities are cut. It shortens the time from one-half to one-third.

The machine cuts cotton or woollen fabrics, knit goods, etc. Used for binding, facing, fronts, button-stays, etc., straight or bias.

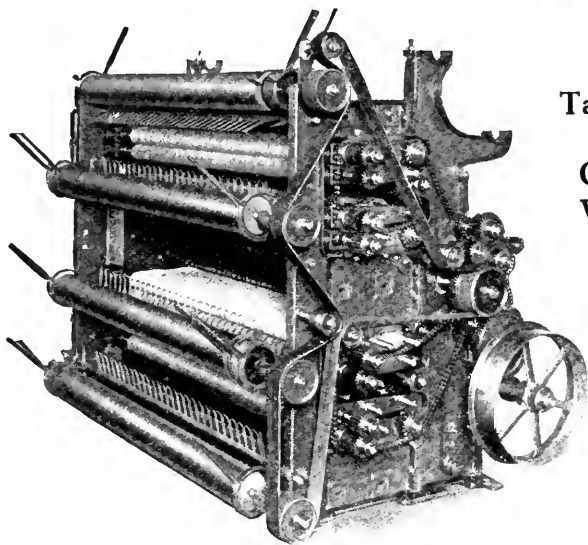

It cuts bolts of cloth in the wide fold into strips, folds, irons and winds them into perfect rolls.

It saves some cloth on each strip by cutting so exactly that the folded edges are narrower.

Send us a sample of the cloth you want to cut or fold and we will send you more complete information.

Leading Textile Mills

Order Lewis Box Trucks and Shipping Boxes

For their remarkable durability in hard service—for their aid in cutting production costs and making it easier to handle delicate fabrics—Lewis Box Trucks and Shipping Boxes are in demand by leading textile mills everywhere.

This recognized superiority of Lewis Box Trucks and Shipping Boxes comes of 30 years' experience in weaving wood and wire into the most durable containers and those that give lowest final cost. Write us regarding Lewis containers and the newest ideas for handling textiles in process and in shipment.

The Ideal Box Truck—the LEWIS

THREE PLY VENEER PACKING CASES

The practical package for all Textile Products

STRENGTH:

Equal to $\frac{7}{8}$ lumber.

WEIGHT:

About 60% of lumber case of equal strength.

TIGHTNESS:

Sides, tops, bottoms and ends are each of one piece making a dust and water tight case.

APPEARANCE:

Much neater than any other type case.

PROOF:

This case is now being used by some of the largest textile manufacturers in the country.

If you will give us sizes, inside dimensions, weights to be carried and material to be packed we will be pleased to make quotations.

A Perfect Oilless Bearing

*Never Need
Oil*

*Never Need
Oil*

"BEST FROM ALL ANGLES"

Unequalled in the Textile field where the elimination of oil and soil are essential and accomplished with minimum initial cost and upkeep.

Nolu Bearings are standard equipment with leading builders of machinery for practically all phases of the Textile industry, weaving, winding, spinning, etc., wool, cotton, silk and other lines.

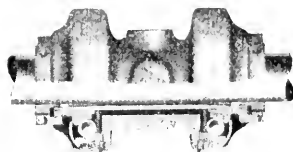

Try our New High Temperature Bearings

Quotations and Samples on request.

Nolu Oilless Bearing Company

6 E. JOHNSON STREET, GERMANTOWN, PA.

BALL BEARINGS **Chapman** YOU PAY FOR THEM WHETHER YOU BUY THEM OR NOT

Save from 15% to 35% of your Power

You can easily do it by installing Chapman Ball Bearings on your line shaft and swing frame hangers—by using Chapman Ball Bearing Pillow Blocks and Chapman Ball Bearing Loose Pulleys.

They overcome friction and hot boxes—they save the wasted power—they apply it to increased speed and greater production—they eliminate all attention except greasing once or twice a year—they avoid all spoilage of goods from dripping oil—they last a life-time under the most severe service. You cannot make a better paying investment in your mill.

*Use your old hangers—
Chapman Ball Bearings fit every type
of standard hanger.*

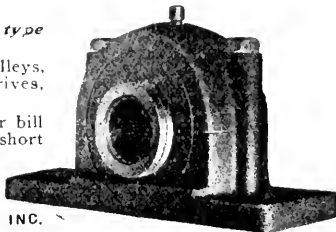

They can be applied to guide pulleys, sheave wheels, head shafts, main drives, and clutch sleeves.

They will greatly reduce your power bill and charge off their cost in a very short time.

Our engineers will gladly help you.

Send for complete information.

Table of Contents

This TABLE OF CONTENTS has been arranged with a view to aiding users of the Directory to find quickly the information they are seeking. The various factors are arranged according to their places in the industry; i.e., Raw Material Dealers are listed first, Yarn Spinners second, etc. Mills manufacturing products other than Yarns, such as Piece Goods, Braids, Carpets, etc., are listed under "Manufactured Goods." Selling Agents, Commission Houses and Brokers are listed last.

GENERAL

Abbreviations, Explanation of.....	159	Mill Data Received Too Late for Classification.....	153
Advertisers, Index to.....	151	Mills with Data (Arranged Geographically).....	157
Alphabetical Index of Mills and Manufacturers in United States and Canada.....	1005	Mills with Worsted Machinery.....	615
Associations, Textile.....	618	Number and Kind of Mills in Each State.....	149
Buyers' Index for Machinery and Mill Supplies.....	115	Schools, Textile.....	618
Canadian Mills.....	587	Textile Associations (see Associations, Textile)	
Maps, Explanation of.....	159	Textile Schools (see Schools, Textile)	
Mexican Mills.....	609		

RAW MATERIALS

Artificial Silk.....	875	Re-Worked Wool.....	925
Carded Cotton Dealers.....	859	Silk (see Raw Silk, Yarns and Waste Dealers)	
Cotton Dealers.....	803	Waste (Cotton and Woolen).....	905
English Cotton Dealers.....	861	Waste, Silk (see Raw Silk, Yarns and Waste Dealers)	
Flocks.....	929	Wool Dealers.....	877
Noils, Silk.....	737	Wool Pullers.....	903
Rag Dealers, Wholesale.....	930		
Raw Silk, Yarns and Waste Dealers.....	865		

YARNS

Dealers, Agents and Commission Merchants.....	747
---	-----

(Arranged according to Cities)

Spinners

(Classified according to Yarns Spun)

COTTON YARNS

Bleached Yarns.....	711
Carded Frame Spun (Single and Ply).....	679
Carded Frame Spun, Colored.....	687
Carded Mule Spun (Single and Ply).....	679
Carded Mule Spun, Colored.....	679
Carded Weaving Yarns.....	697
Colored Weaving Yarns.....	709
Combed Frame Spun Peeler and Egyptian (Single and Ply).....	689
Combed Mule Spun Peeler and Egyptian (Single and Ply).....	689
Combed Peeler, Egyptian and Sea Island Weaving Yarns.....	707
Fancy Mixes.....	695
Gassed Yarns.....	713
Glazed and Polished Yarns.....	711
Jaeger Yarns.....	693
Mercerized Yarns.....	711
Mop Yarns.....	713
Novelty Yarns, Cotton.....	715
Thread Manufacturers.....	715
Thread Yarns.....	715
Tinsel Yarns.....	715
Tire Yarns.....	709
Twine.....	716
Wool Spun Cotton Yarns.....	695

SILK YARNS

Artificial Silk Yarns, Dealers in New York City.....	875
Colored Yarns, Silk.....	737
Embroidery Silks.....	737
Knitting Silks.....	737
Spun Artificial Silk.....	735
Spun Silk Yarns.....	734-735
Threads, Silk.....	737
Thrown Silk.....	737
Yarn Dealers, Silk.....	865

WOOLEN YARNS

Belgium System, Fine Counts.....	719
Carpet Yarn, Double Reel.....	723
Carpet Yarn, Single Reel.....	721
Colored Yarns and Mixes.....	721
Knitting Yarn, Merino.....	719
Knitting Yarn, Woolen.....	719
Novelty Yarns, Woolen.....	722
Warp and Filling.....	721

WORSTED YARNS

Boucle, Worsted.....	731
Bourette, Worsted.....	731
Bradford System, Carpet Yarns.....	727
Bradford System, Delaine Australian Ex. Fine Quality.....	725
Bradford System, Fancy Mixtures.....	727
Bradford System, Luster Yarns.....	723
Bradford System, $\frac{1}{4}$ to $\frac{3}{8}$ Blood.....	723
French Spun, $\frac{1}{4}$ to $\frac{3}{8}$ Blood, White or Natural.....	729
French Spun, Fancy Mixtures.....	731
French Spun, Fine Qualities.....	729
French Spun, Worsted and Cotton Mixtures.....	731
Genapped Yarns, Worsted.....	733
Novelty Yarns, Worsted.....	733

LINEN, JUTE AND MOHAIR YARNS, ETC.

Jute Yarns and Twine.....	740
Linen Yarns and Twine.....	739
Mohair Yarns.....	733
Paper Yarns, etc.....	677

BLEACHING, DYEING, PRINTING AND FINISHING

(Mills doing Work for the Trade. Classified according to Work Handled) 1923

Cotton Cloth Printing and Finishing.....	789	Colors for Weaving Trade.....	769
Cotton Hosiery Printing (Resist and Ex- tract)	783	Stockinet Dyeing, Bleaching and Finish- ing	789
Cotton Piece Goods, Dyeing, Bleaching and Finishing.....	785	Vigoureux Printing	771
Cotton Stock Dyeing and Bleaching.....	775	Wool Carbonizing (Raw Stock).....	767
Cotton and Woolen Piece Goods (Union Goods) Finishing.....	775	Wool Dyeing (Raw Stock).....	767
Cotton Yarn Bleaching.....	781	Woolen Cloth Printing.....	773
Cotton Yarn Dyeing.....	775	Woolen and Worsted Dress Goods Dyeing and Finishing.....	773
Cotton Yarn Gassing.....	783	Woolen and Worsted Knit Goods Bleach- ing	771
Cotton Yarn Mercerizing.....	783	Woolen and Worsted Knit Goods Dyeing.....	771

Buyers' Index

FOR

Machinery and Mill Supplies

The following Classified Index of Advertisers in this Directory contains the names of nearly all the principal builders of Textile Machinery and Dealers in Mill Supplies. The advertisements of these concerns can be found by referring to the Alphabetical Index to Advertisers, Page 151. Any buyers who are unable to find in this index the machinery or supplies desired, are invited to communicate with the publishers, who can in all probability refer them to the proper sources.

KLAUDER - WELDON

Dyeing - Bleaching Scouring Machinery

The leading Mills use K-W machines because they can buy no better at any price—the smaller Mills use them because they are the most economical in ultimate cost.

You take no risk when you buy a K-W Machine. Our years of experience and the efficiency of our methods of manufacture guarantee that every machine will “Stand up” under the most exacting demands. Our interest in upholding the K-W reputation means that you *MUST* be satisfied and our suggestions to prospective purchasers are made with the view toward solving any dyeing, bleaching or scouring problem for all time. We will be glad to answer any and all questions on your part whatsoever.

Do YOU Use the TEXTILE CLEARING HOUSE?

Nowadays there is no such thing as "discarded Textile Machinery."

Whenever a machine outgrows its usefulness in one mill it is advertised in the Textile Clearing House and soon takes up its work in another mill.

This also applies to odd lots of yarns, dyestuffs, mill supplies, etc.

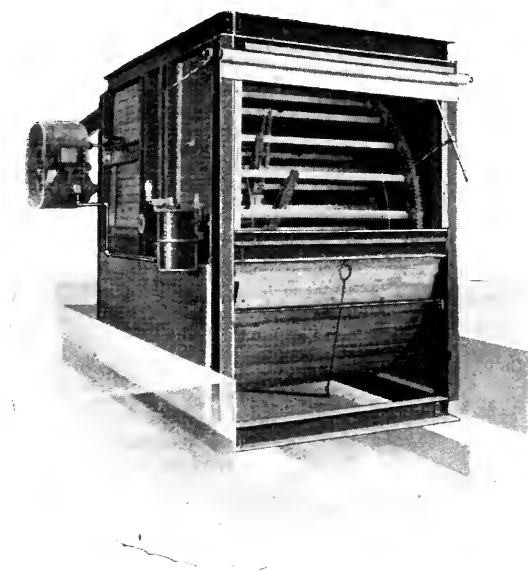

Do YOU use the Clearing House?

Rates at the top of each Clearing House page in

Textile World

334 Fourth Ave.

in *Textile Scouring* use

PAROXAN

FOR
**WORSTEDS, FELTS
WOOLENS, MOHAIR**

Saves $\frac{1}{3}$ to $\frac{1}{2}$ the pails of soap liquor used. Preserves and improves the natural condition of the goods. A highly concentrated solvent not injurious to goods and not inflammable.

in *Textile Fulling* use

EMAROL

FOR
**HEAVY WOOLENS,
WORSTEDS AND
JERSEY CLOTHS**

Eliminates most fulling troubles. Supplies a much needed lubrication. Is an excellent soap assistant, prevents folds cracking the fabric and emulsifies any oil used on the stock.

An Excellent Quality Enhancer

EBCO-MULSION

Used on
**Woolens, Worstedes,
Cotton Goods**

WHAT WILL THE DYE DO ?

A wide range of color

is available in the line of "National" dyes—
dyes for

Cotton
Wool

Silk
Knit Goods

Carpets

and the many other branches of the textile trade. The "National" line of dyes is adequate to meet the fashionable as well as the staple color demands.

A practical dyeing service—

the "National" Laboratories and the "National" Practical Dyes Specialists—at the service of the textile mill at all times. Each "National" Branch Office will co-operate with you to help solve your dyeing problems.

A "National" Color Card

is available, showing the application of "National" Dyes to your class of goods! Send for it!

"NATIONAL" DYES
FOR TEXTILES

DELAHUNTY

Dyeing, Bleaching, Oxidizing and Tom-Tom Machinery

FOR

Raw Stock, Cotton, Wool, Hosiery, Shirts, Drawers, Hats,
Caps, Waste Stock, Rags, Linters, Yarn, Warp, etc.

The name "Delahunt" is familiar to textile men throughout the length and breadth of the land. It has become famous simply and solely because the machines bearing this name have delivered more than satisfactory service.

New Raw Stock Dyeing Machine

The latest member of a family of machines that have won distinction in the textile finishing field. Some of the features of the new machine; improved circulation, ease of loading and unloading, circulating pump design to give a large flow of liquor under a pressure suitable for dyeing sulphur, direct or vat colors.

***Silk Throwing Machinery,

SOAPS

—for Every Textile Need

A record of more than 35 years of soap manufacture; a policy that insists on unquestionable and unvarying quality; a reputation for practicing the "Golden Rule" of serving others as we would like to be served—these are the advantages we offer textile manufacturers.

The J. T. Robertson Co., Inc.

Syracuse, N. Y.

Established 1885

Serving the Textile Industry

To be the acknowledged organ of the great American Textile Industry is a distinction of which any business paper might well feel proud.

TEXTILE WORLD, issued every Saturday, is eagerly read by the textile men in all branches of the industry—in all sections of the country.

More than 850 advertisers regularly use TEXTILE WORLD as a medium for carrying their messages to mill executives, who spend on an average \$10,000,000 per week for new construction, machinery, mill supplies and manufacturing equipment.

Subscription rates per year—U. S. (East of Mississippi River)—\$4.00; U. S. (West of Mississippi River), on account of extra postage—\$5.00; Canada, Mexico, Cuba and U. S. Possessions — \$5.00; Other Foreign Countries—\$7.00.

*The number of mills given in this column is not always the total of the different kinds of mills listed in the previous columns, because where a mill manufactures more than one kind of goods (for example, cotton and silk fabrics) it would be reported in each of those columns separately, but would be counted as only one mill in the total column. The column of "Mills with Dye Houses" is not included in the "Total" column because the mills in that column are already counted in the classified columns. Miscellaneous mills, such as Beaming and Asbestos plants, not otherwise listed, are included in this total.

Ninety-five per cent. of the total production of the industry is made by about 6,000 mills, whose average annual production ranges from \$20,000 to over \$1,000,000 in value. These mills form the backbone of the industry. They spend annually over \$500,000,000 for new construction, machinery, equipment and supplies (not including raw materials).

TEXTILE WORLD'S net paid circulation is distributed almost exactly the same (numerically and proportionately) as the industry itself. Advertisers cover all branches effectively and economically—without waste.

†Mills with dye houses. Does not include Mills Dyeing for the Trade. (See column 3.).
Misc.—Means Mills that handle Shoe and Corset Laces, Embroideries, Tinsels, Trimmings, Insulated Wire.

X—is for Mattress Felts, Wadding, Batting, Waste, Absorbent Cotton,

The Best Prospect Lists for Salesmen

Help your salesmen to obtain best results from their territories by sending each a copy of the Vest Pocket Editions of the OFFICIAL AMERICAN TEXTILE DIRECTORY. No other lists will be needed.

The Vest Pocket Editions of the OFFICIAL AMERICAN TEXTILE DIRECTORY insure your obtaining complete lists of all the mills in the various territories. Books not only contain names of the mills but also give reports as to capitalization, officials, equipment, goods made, power used and yarns bought,—just the information salesmen need.

These compact little volumes slip into the vest pocket and are ideal for salesmen. Arrangement of listings insures all mills being covered. Also contain railroad connections and special copyrighted maps showing location of mill towns.

The Original and Standard Mill White

FOR FACTORY CEILINGS AND WALLS

THE RICE PROCESS WHITE

Used in over 8,000 Industrial plants

Increases your light 19% to 36% by actual tests. Has just the right lustrous finish to attract light, yet resist dirt. Is sanitary and can be washed clean like tile. Remains white long after other paints have turned yellow under the same conditions. This we guarantee.

BARRELED SUNLIGHT

The only oil paint with a smooth lustrous white finish. Made by the "Rice Process" which combines intense whiteness, ease of application and a "hiding" power that is unequalled. Contains no varnish. Its firm, yet elastic surface will not crack or scale, for it expands and contracts with the temperature changes, and withstands vibrations. For all interior use where light and cleanliness are desired.

Sold in barrels, also in cans. Made also in Egg-Shell and Flat Finish

Write for Booklet "More Light" and Sample Board

PROVIDENCE

RHODE ISLAND

EXPLANATION OF MAPS AND GENERAL ARRANGEMENT

The arrangement of the mill section of the Directory is first, alphabetically by States; second, alphabetically by towns and cities in each State; third, alphabetically by name of mill, under its proper post office address. In some instances the railroad and freight station is not the same as the post office address, and in these cases the proper railroad station is designated.

The Directory is illustrated by copyrighted maps of the principal manufacturing States east of the Mississippi River, and the Provinces of Quebec and Ontario, showing the location of the textile mill cities and towns. These maps are engraved especially for the OFFICIAL AMERICAN TEXTILE DIRECTORY, and are arranged with special reference for the convenience of those desiring to reach the textile establishments. The Southern, Western and Central States are arranged in groups; most of the New England and Middle States are shown with separate maps for each State. Under each State heading at the top of right hand pages reference is made to the page of map for that State.

The State maps are divided into square sections, designated by letters and numbers. In the body of the Directory, after the name of the city or town, the square in which it is located on the map is designated thus: in the case of Passaic, N. J.—“Passaic, D-9”; meaning that Passaic will be found in the horizontal section D and the vertical section 9 of the New Jersey map.

It should also be carefully noted that each square is a certain number of miles. Under the title of each map will be found the scale of miles to each square in that map. In this way distances can be very closely approximated.

Following the letters indicating the location of the town will be found abbreviations of the railroad connections, which will enable one to refer intelligently to any railway guide for his train connections. If the town is not on the railroad, the nearest railroad station is given and the distance from it.

The population of the place follows the railroad abbreviations.

EXPLANATION OF ABBREVIATIONS

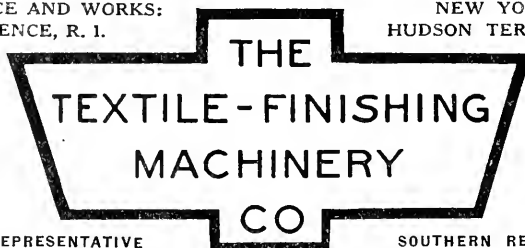

Under each city or town are grouped all the textile mills in that place, without regard to kind of goods made. The kind of mill, i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows:—

A means asbestos mill.	J means jute mill.	P means paper yarns, twines, etc.
B means beaming and burling.	K means knitting mill.	Pr means print works.
Bl means bleachery.	L means linen mill.	S means silk mill.
C means cotton mill.	M means mercerizing.	W means woolen mill.
D means dyeing establishment.	Misc means mills making braids; insulated wire; shoe and corset laces; embroid- eries; tinsels; fringes; trimmings; etc.	X means mills making felts (all kinds); mattresses; wadding; absorbent cot- ton; battings; waste; etc.
F means finishing works.		
Fl means flax mill.		
G for grass fibre plants.		
W. W. means water wheels.		
Dye. If the mill has dyeing facilities, the word “dye” is used.		
Power. The kind of power is designated— steam , number of boilers; water , number of water wheels; electric , generate or buy.		
S. Agts. means selling agents.		
Buyer. In most instances the name of the man who does the buying is given for the larger mills. In smaller mills, or those operated by individuals, the principals usually buy.		
Pop. Population.

Patent Waste Saver

The Waste Saver returns the fibre to the cards without loading them or injuring the wire. The apron continually in motion does not permit of an accumulation of fly, shive, and dirt, and returns the stock practically fibre for fibre, throwing the shive and dirt on the floor. The shive and dirt is thrown out in front of the Waste Saver apron, and is easily removed. Used by most leading mills. Investigate its superior merits.

EXPLANATION OF ABBREVIATIONS

Under each city or town are grouped all the textile mills in that place, without regard to kind of goods made. The kind of mill, i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows:—

A means asbestos mill.	J means jute mill.	P means paper yarns, twines, etc.
B means beaming and burling.	K means knitting mill.	Pr means print works.
Bl means bleachery.	L means linen mill.	S means silk mill.
C means cotton mill.	M means mercerizing.	W means woolen mill.
D means dyeing establishment.	Mise means mills making	X means mills making felts
F means finishing works.	braids; insulated wire; shoe	(all kinds); mattresses;
Fl means flax mill.	and corset laces; embroid-	wadding; absorbent cot-
G for grass fibre plants.	eries; tinsels; fringes;	ton; battings, waste, etc.
	trimmings; etc.

EXPLANATION OF ABBREVIATIONS

Under each city or town are grouped all the textile mills in that place, without regard to kind of goods made. The kind of mill, i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows:—

A means asbestos mill.	J means jute mill.	P means paper yarns, twines, etc.
B means beaming and burling	K means knitting mill.	Pr means print works.
Bl means bleachery.	L means linen mill.	S means silk mill.
C means cotton mill.	M means mercerizing.	W means woolen mill.
D means dyeing establishment.	Misc means mills making	X means mills making felts
F means finishing works.	brads; insulated wire; shoe	(all kinds); mattresses;
Fl means flax mill.	and corset laces; embroidery;	wadding; absorbent cotton;
G for grass fibre plants.	trimmings; etc.	batings, waste, etc.

See page 159 for explanation of maps and abbreviations

EXPLANATION OF ABBREVIATIONS

Under each city or town are grouped all the textile mills in that place, without regard to kind of goods made. The kind of mill, i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows:—

A means asbestos mill.	K means jute mill.	P means paper yarns, twines, etc.
B means beaming and burling.	J means knitting mill.	
Bl means bleachery.	L means linen mill.	Pr means print works.
C means cotton mill.	M means mercerizing.	S means silk mill.
D means dyeing establishment.	Mise means mills making	W means woolen mill.

Textile Clearing House

Mill men instinctively go to the Textile Clearing House for

1. THE QUICK DISPOSAL OF USED MACHINERY, ODD YARN, DYESTUFFS, MILL SUPPLIES, AND MILL PROPERTY.
2. LOCATING ANY OF THE ABOVE WHICH THEY MAY NEED AND WANT TO PURCHASE.
3. FINDING THE RIGHT MEN FOR JOBS AND THE RIGHT JOBS FOR MEN.
4. BUSINESS OPPORTUNITIES OF ALL KINDS IN THE TEXTILE LINE.

The Textile Clearing House is the classified advertising section of TEXTILE WORLD, the world's foremost textile paper, published weekly. The advertising rates are so low for the Textile Clearing House that you can afford to use it for almost every requirement. Thousands of mill men who use the Clearing House say it is an indispensable institution of the textile industry.

VALLEY CITY FIBRE CO., THE. (Out of business.)

EXPLANATION OF ABBREVIATIONS

Under each city or town are grouped all the textile mills in that place, without regard to kind of goods made. The kind of mill, i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows:—

A means asbestos mill.	J means jute mill.	P means paper yarns, twines, etc.
B means beaming and burling.	K means knitting mill.	
Bl means bleachery.	L means linen mill.	Pr means print works.
C means cotton mill.	M means mercerizing.	S means silk mill.
D means dyeing establishment.	Misc means mills making	W means woolen mill.
F means finishing works.	braids; insulated wire; shoe	X means mills making felts
Ff means flax mill.	and corset laces; embroid-	(all kinds); mattresses;
G for grass fibre plants.	eries; tinsels; fringes;	wadding; absorbent cot-
	trimmings; etc.	ton; battings, waste, etc.
